Collect - Document - Analyze - Explore

Store data reliable and secure

Document recorded data with meta data

Explore data with powerful engineering tools

Collect and manage constantly growing volume of measurement data

Run automated data analysis

Compute statistics and metrics

Localize anomalies and identify the affected systems and vehicles

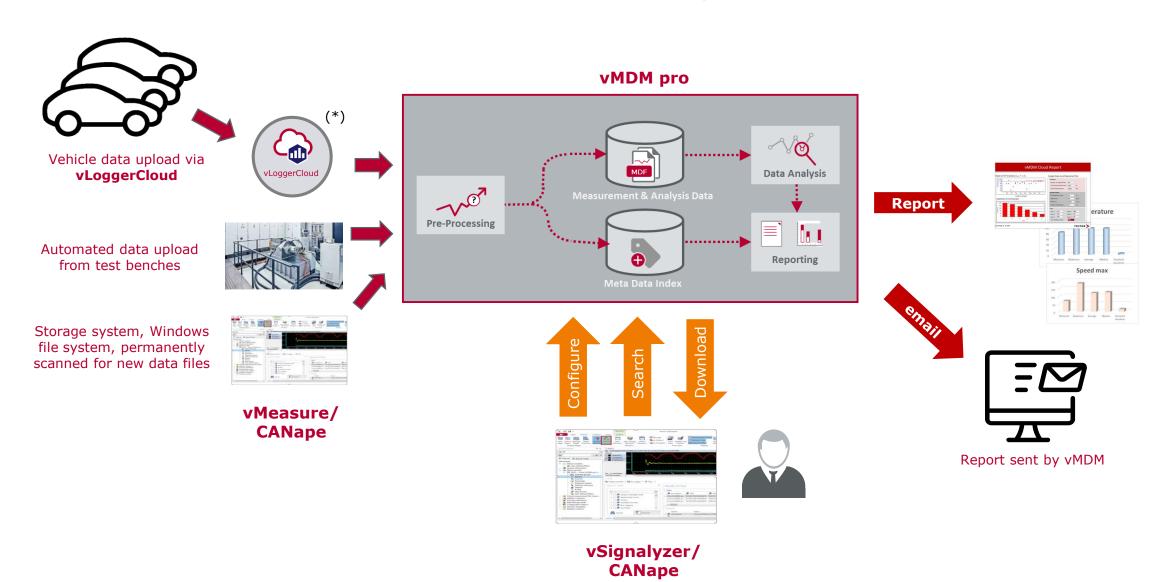

Rely on common automotive standards and modern cloud technologies

vMDM - Core Element in Measurement Data Management

vSignalyzer – the vMDM Frontend Tool

Data analysis at its best

vSignalyzer is the data analysis tool of choice for automotive engineers around the globe.

Explorative analysis

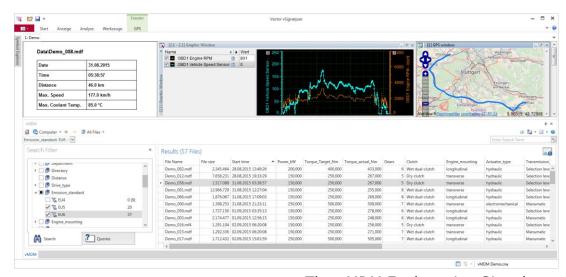

vSignalyzer is fully integrated with vMDM - exploring data from the cloud feels like working with local data.

It optimizes data transfer from the cloud to reduce your cost and waiting time.

Authoring tool for cloud-based data analysis

Development of automated data analysis jobs can be a complex task, depending on your requirements.

vSignalyzer supports you in all phases from prototyping to development & test until deployment of the final analysis jobs in the vMDM cloud.

The vMDM Explorer in vSignalyzer

Get the Information you are looking for

- ▶ Pre-processing to automatically find anomalies, search patterns, events and calculate characteristic quantities
 - ► Max switching currents, voltage drop and slope gradients
 - ▶ Fluctuations and tolerance checks
 - Determination of gear shifts and gear shift times
- Aggregation of meta data
- ► Extensive CANape function library with mathematical, Boolean, statistical functions as well as the functions of the eMobility Analyzer
- ▶ Conversion of raw data format to the powerful, standardized mf4 format
- ▶ Definition of pre- and post-processing with standard CANape/vSignalyzer on-board tools

Pre-Processing Results

- ▶ Immediate display of the results of pre-processing in the vMDM Explorer.
 - ▶ In the example shown: Number of automatically detected dips of the inverter efficiency

| | File Name | Author | Department | Power | BatteryCap | 🗿 Range | Software V | Calibration | NumberOfHits | Project | Subject | Preprocessing State |
|---|---------------|----------------|------------|--------|------------|---------|---------------|---------------|--------------|-------------|----------|---------------------|
| F | SW-I_EMOT_20 | Test Engineer | testing | 120 kW | 45 kWh | 190 km | InvEff_V01SP3 | V01SP3_CAL003 | 7,000 | eDrivetrain | Inverter | Success |
| | SW-I_EMOT_20 | Test Engineer2 | Validation | 120 kW | 40 kWh | 180 km | InvEff_V01SP2 | V01SP3_CAL003 | 2,000 | eDrivetrain | Inverter | Success |
| | Flugzeugmotor | Test Engineer | Testing | 120 kW | 45 kWh | 190 km | InvEff_V01SP3 | V01SP3_CAL001 | 2,000 | eDrivetrain | Inverter | Success |
| | SW-I_EMOT_20 | Test Engineer2 | testing | 120 kW | 45 kWh | 185 km | InvEff_V01SP3 | V01SP3_CAL003 | 7,000 | eDrivetrain | Inverter | Success |
| | eDrive_1.mf4 | Test Engineer | testing | 120 kW | 45 kWh | 190 km | InvEff_V01SP3 | V01SP3_CAL003 | 3,000 | eDrivetrain | Inverter | Success |
| | eDrive_0.mf4 | Test Engineer | testing | 120 kW | 45 kWh | 190 km | InvEff_V01SP3 | V01SP3_CAL003 | 2,000 | eDrivetrain | Inverter | Success |
| | SW-I_EMOT_20 | Test Engineer2 | testing | 115 kW | 45 kWh | 185 km | InvEff_V01SP3 | V01SP3_CAL004 | 7,000 | eDrivetrain | Inverter | Success |

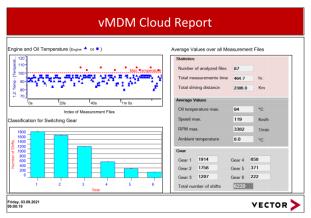

Advantages:

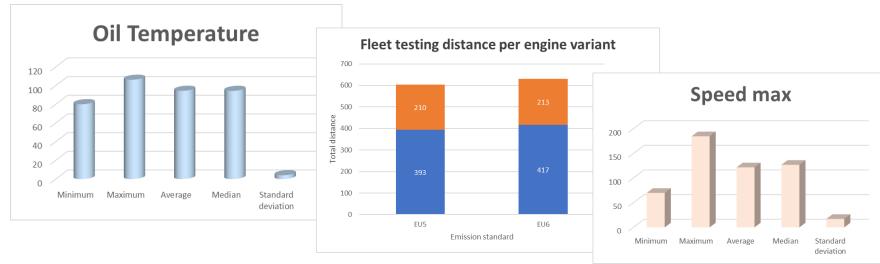

- ▶ No manual, time-consuming searching of the measurement files
- ▶ Direct conclusion on affected measurement and configuration of the measurement object (e.g. SW status, used parameter set)

vMDM - Automated Data Analysis in the Cloud

- vMDM offers 2 types of reports:
 - vMDM Index Reports for the evaluation of meta data
 - vMDM CASL/PDF Reports for the evaluation of measurement data
- ▶ The vMDM Explorer offers full access to the reports
- ▶ Reports are generated based on a report job (schedule, filter for measurement data)
- Email notification for successful and/or filed reports jobs

What our customers say about vMDM

Large OEM:

"After successful implementation of the required used cases, vMDM is firmly established in the tool chain at our company. The data stored and the analyses in vMDM have a direct impact on the design of the product properties."

vMDM enables the existing knowledge to be made visible."

OEM/Tier1 with Technical Centers distributed worldwide:

"vMDM significantly supports us in establishing uniform processes for data analysis of recorded measurement files."

Engineering Service Provider:

"Thanks to the capabilities of vMDM, we can now run the specific analyses and evaluations required to assess product quality."
