for CSM measurement modules

CSM Accessories

We offer suitable XCP-on-Ethernet and EtherCAT® (XCP/ECAT) interface and connection cables, power supply cables, sensor cables, CAN connection cables and sync cables for our measurement modules. The portfolio is extended by HV safe sensor cables and connectors - so that you are also ideally equipped for measurement in a high-voltage environment.

The system cables for our measurement modules are specially made for the respective measurement task. They are designed for immunity to noise, low internal resistance and a wide temperature range. Furthermore, they are flexible and highly resistant to chemicals, including fuel and oil.

We also provide a wide range of other accessories, including the USB-to-CAN interface CSMcan, system and signal cables, plugs, sockets, mounting materials, antennas as well as memory cards. You can find more information on our website and in the respective accessories brochures (also available for download).

Do you still have questions or need individual solutions? Please contact us - you will find our contact details at the end.
