

CSMisotest Licensing Model

License acquisition

- ▶ The buyer acquires a license granting the right to use the delivered software version for a limited period of 12 months (license subscription).
- ▶ The software can no longer be used after the license period has expired.

Maintenance

- ▶ The maintenance costs are included in the license fees. The scope of maintenance includes:
 - ▶ Support for further module types according to version planning
 - ▶ Enhancements to the software's range of functions
 - ▶ Ensuring compatibility of new hardware revisions and firmware versions
 - ▶ Support by phone and e-mail

Start of the period of use

- ▶ The licensed period of use begins on the date of delivery of the CSM hardware and software components. The period of use can be obtained from your Sales contact.

Options for license renewal

- ▶ Extension of the license by 12 months when purchasing the software. The total period of use is then 24 months.
- ▶ Extension of the license for a further 12 months before the expiration of the valid license.
- ▶ Renewal of the license for several years in advance.
- ▶ In the event of a suspension of use, a 25 % surcharge may be levied on the license renewal price when a further license renewal is requested.

Scope of license

- ▶ A license entitles the user to use CSMisotest in order to test the isolation of an unlimited number of CSM HV measurement modules based on EN61010-1:2020-03, Annex F.

License model

- ▶ The license for CSMisotest is linked to a hardware dongle. The software can be used in conjunction with any PC/notebook to which the hardware dongle is connected.

License fees

The license fee depends on the number of CSM HV measurement modules purchased.

License designation	Number of modules
CSMisotest Package S	less than 100
CSMisotest Package M	100 to 499
CSMisotest Package L	500 and more
